Huzaifa Aamish

AI Engineer | Senior SQA Engineer
Email: huzaifa.aamish@gmail.com | Phone: +92-303-9042017 | Location: Lahore, Pakistan | LinkedIn: linkedin.com/in/huzaifa-aamish | GitHub: github.com/Huzaifa-Aamish-SQA | Open to Relocation and Remote Worldwide

Professional Summary

AI Engineer and Senior SQA Lead with 7+ years in software quality assurance and 1 year of hands-on AI engineering. Build RAG chatbots, AI agents, semantic search, and LLM integrations using OpenAI, Claude, Gemini, Python, FastAPI, LangChain, LangGraph, PostgreSQL, and n8n. QA background across mobile, VOIP, eSIM, HRMS, CRM, and SaaS platforms, including a 75 percent drop in production defect leakage and a 50 percent cut in regression cycle time at Hayo. Combines engineering and testing to ship AI features that are accurate, tested, and production ready. Targeting AI Engineer, AI QA, or QA Lead roles, remote or in the USA, Canada, Europe, or Middle East.

Core Competencies

QA Strategy	**Test Automation**	**AI-Assisted Testing**	**eSIM and VOIP QA**	**API Testing**
Agile and Scrum	**Analytics Validation**	**LLM Apps and RAG**	**Mobile App Testing**	**AI Agents and n8n**

Technical Skills

- Test Planning, Strategy, and Governance
- Functional, Regression, Smoke, and UAT Testing
- API Testing: Postman, REST, and GraphQL
- Performance and Load Testing: JMeter
- Mobile Testing: iOS and Android
- Analytics Verification: Mixpanel, Customer.io, Adjust
- Deep Link and Deferred Deep Link Testing
- eSIM Provisioning and VOIP Module Testing
- Test Automation: Selenium and Autify
- Bug Tracking: Jira, Trello, TestLink, Confluence
- Crash Analysis: Firebase Crashlytics
- AI Tools: ChatGPT, Claude, Gemini, GitHub Copilot
- Programming: Python, FastAPI, PostgreSQL, Git and GitHub
- CI/CD Pipeline Integration
- Methodologies: Agile, Scrum, and Kanban
- Platforms: Windows, macOS, and Linux

AI Engineering Skills

- RAG chatbots with document retrieval and source citations
- AI agents and tool-calling workflows with LangChain and LangGraph
- Semantic search using vector embeddings and PostgreSQL
- LLM integration with OpenAI, Claude, and Gemini APIs
- Backend APIs for AI apps with Python and FastAPI
- Business workflow automation and chatbot integrations with n8n
- Prompt engineering and system prompt design
- LLM output evaluation: accuracy, hallucination, and regression checks
- AI-assisted test case generation and synthetic test data
- AI-powered websites and apps for SaaS, fintech, e-commerce, healthcare, and e-learning

Professional Experience

SQA Manager | Hayo
August 2024 - Present

Lahore, Pakistan

- Lead and mentor a 7-member QA team delivering end-to-end quality assurance for Slick, a high-performance VOIP and eSIM application with 2 Million’s of active users on iOS and Android.
- Architect QA strategy across 4 product modules (VOIP, eSIM, Mobile Top-Up, and Payments), maintaining 100 percent test case coverage on all critical user journeys using Jira and TestLink.
- Cut production defect leakage by 75 percent through risk-based testing frameworks, shift-left practices, and structured triage workflows applied across 12 monthly release cycles.
- Integrated ChatGPT and Claude into test design workflows, lowering test authoring effort by 30 percent and broadening scenario coverage by 40 percent within the first 2 sprint cycles.
- Expanded role into hands-on AI-assisted development, building internal tooling and interfaces for a national SIM registry platform (Ghana NSR) and a device registry (EIR) proof of concept.
- Worked on device automation, server setup, and async architecture for an A2P SMS OTP Sender ID capture system (Zammani Honeypot).
- Deployed Autify automation across all regression suites, shrinking sign-off time from 4 days to under 2 days and enabling same-day approval for critical sprint releases.
- Authenticated 67 analytics events across Mixpanel, Customer.io, Firebase, and Adjust using Postman and Selenium, confirming 100 percent accuracy of triggers, properties, and parameter mappings.
- Built 5-KPI executive dashboards in Jira covering defect density, escape rate, execution rate, cycle time, and release readiness, used weekly by C-level leadership for go/no-go decisions.
- Achieved zero critical defect escapes across 3 consecutive sprint releases by implementing deep link and deferred deep link regression suites, eliminating all navigation failures before production.

AI Engineer | Freelance
2025 - Present

Remote

- Build RAG chatbots, AI agents, and semantic search features for client products in SaaS, fintech, e-commerce, healthcare, and e-learning.
- Integrate OpenAI, Claude, and Gemini into websites and apps using Python, FastAPI, LangChain, LangGraph, and PostgreSQL.
- Automate business workflows with n8n, including AI chatbots, lead handling, and data analysis pipelines.
- Apply 7 years of QA practice to AI output testing, covering answer accuracy, edge cases, and regression checks after prompt or model changes.

SQA Team Lead | WADIC
November 2023 - July 2024

Lahore, Pakistan

- Directed QA for a construction estimating SaaS platform serving engineering firms across 3 regions, owning test strategy for web, mobile, and desktop surfaces throughout the engagement.
- Authored 200-plus test cases across 6 major feature releases, covering functional, regression, integration, and load testing scenarios tracked and managed in Jira and TestLink.
- Uncovered and resolved 5 critical performance bottlenecks through JMeter-based load testing, improving platform response time by 20 percent under peak concurrent usage.
- Decreased average defect triage-to-resolution time by 25 percent and cut invalid defect reports by 30 percent through standardized Jira bug reporting workflows and severity classification rules.
- Lowered sprint requirement ambiguity by 35 percent by establishing quality benchmarks and testing milestones in close collaboration with product managers and development leads.

Principal SQA Engineer | Hexaa
May 2021 - October 2023

Lahore, Pakistan

- Owned module-level QA across 4 concurrent product streams, sustaining full functional and regression coverage across 30-plus sprint releases over a 2.5-year tenure.
- Restructured the Jira defect management workflow, decreasing duplicate defect reports by 40

percent and cutting average resolution time from 3 days to under 1 day.

- Compiled a library of 500-plus reusable test cases in Confluence and TestLink, shortening QA onboarding time for new engineers by 2 weeks and ensuring cross-team test consistency.
- Sustained a release defect escape rate below 2 percent across all projects through disciplined regression, integration, and exploratory testing on web, mobile, and desktop surfaces.

SQA Engineer | Aramis Enterprise Solution

March 2019 - April 2021

Lahore, Pakistan

- Tested enterprise HRMS covering employee management, payroll processing, and performance tracking for 1,000-plus records across 8 configurable modules using Postman and Selenium.
- Confirmed CRM data integrity across 10-plus workflow modules including lead management, sales pipeline tracking, and customer engagement automation for a mid-size enterprise client.
- Lowered the defect injection rate by 30 percent through proactive collaboration with developers and business analysts to resolve specification gaps before each development sprint began.

- Established structured sprint quality reports and test status dashboards adopted across a 3-member QA team, giving leadership consistent and accurate visibility into release quality.

Key Achievements

- 75 percent drop in production defect leakage - Hayo
- 100 percent test case coverage sustained across all 4 product modules
- 50 percent faster regression sign-off via Autify automation rollout
- Zero critical defect escapes across 3 consecutive sprint releases
- 30 percent less test design effort through AI-powered generation
- 67 analytics events authenticated with full property-level accuracy
- 500-plus reusable test cases compiled and maintained at The Hexaa
- Formal award for process improvement and reporting excellence at WADIC

Education

Master of Science in Information Technology

University of Management and Technology (UMT)

Lahore, Pakistan | 2018 - 2020

Master of Science in Information Technology

University of Sargodha

Sargodha, Pakistan | 2014 - 2016

Certifications and Professional Development

- Prompt Engineering for Developers, Completed 2024
- ISTQB Certified Tester Foundation Level, In Pursuit
- Agile Scrum Master Certification (CSM/PSM), In Pursuit
- AI for Software Testing and Quality Engineering, Ongoing
- GenAI and Agentic AI Training Program, Pak Angels (Cohort 11), Ongoing
