

Huzaifa Aamish

Senior SQA Engineer | AI Engineer | Quality Engineering Lead

huzaifa.aamish@gmail.com | +92-303-9042017 | Lahore, Pakistan | linkedin.com/in/huzaifa-aamish | Open to Relocation and Remote Worldwide

PROFESSIONAL SUMMARY

Senior SQA Engineer and Quality Engineering Lead with 7 years of progressive experience in software quality assurance for mobile, VoIP, eSIM, HRMS, CRM, and SaaS platforms. Proven record of building QA teams, defining test strategies, and embedding AI tools to raise quality outcomes. Also works as an AI engineer: using AI to design and test faster, and to build products and websites end to end, from design through deployment, holding what is built to the same quality bar as what is tested. Career highlights include a 75% drop in production defect leakage, full test case coverage across 4 product modules, and a 50% cut in regression cycle time at Hayo. Authenticated 67 analytics events with complete property accuracy. Proficient in Selenium, Postman, JMeter, Jira, Mixpanel, and Firebase, with Agile and Scrum delivery. Targeting Senior SQA Engineer or QA Manager positions in the USA, Canada, Europe, Middle East, or Remote.

CORE COMPETENCIES

QA Strategy

AI-Assisted Testing

API Testing

Analytics Validation

Mobile App Testing

Test Automation

eSIM and VoIP QA

Agile and Scrum

Performance Testing

Release Governance

TECHNICAL SKILLS

- Test Planning, Strategy, and Governance
- API Testing: Postman, REST, and GraphQL
- Mobile Testing: iOS and Android
- Deep Link and Deferred Deep Link Testing
- Test Automation: Selenium
- Crash Analysis: Firebase Crashlytics
- Version Control: Git and GitHub
- Methodologies: Agile, Scrum, and Kanban
- Functional, Regression, Smoke, and UAT Testing
- Performance and Load Testing: JMeter
- Analytics Verification: Mixpanel, Customer.io, Adjust
- eSIM Provisioning and VoIP Module Testing
- Bug Tracking: Jira, Trello, TestLink, Confluence
- AI Tools: ChatGPT, Claude, GitHub Copilot
- CI/CD Pipeline Integration
- Platforms: Windows, macOS, and Linux

AI AND MODERN QA SKILLS

- End-to-end product and website development using AI, design through deployment
- Prompt engineering to automate QA documentation workflows
- Synthetic test data creation using large language models
- GitHub Copilot for automation script authoring and review
- Automated release readiness scoring and quality gate checks
- Exploratory testing acceleration through AI-based gap detection
- AI-powered test case generation and scenario expansion
- AI-driven defect pattern analysis and intelligent triage
- AI-enhanced integration and API test scenario development
- Risk-based test prioritization using AI-driven insights
- Self-healing regression script maintenance and upkeep

PROFESSIONAL EXPERIENCE

SQA Manager | Hayo

August 2024 - Present | Lahore, Pakistan

- Lead and mentor a 7-member QA team delivering end-to-end quality assurance for Slick, a high-performance VoIP and eSIM application with 2 million+ active users on iOS and Android.
- Architect QA strategy across 4 product modules (VoIP, eSIM, Mobile Top-Up, and Payments), maintaining 100% test case coverage on all critical user journeys using Jira and TestLink.
- Cut production defect leakage by 75% through risk-based testing frameworks, shift-left practices, and structured triage workflows applied across 12 monthly release cycles.
- Integrated ChatGPT and Claude into test design workflows, lowering test authoring effort by 30% and broadening scenario coverage by 40% within the first 2 sprint cycles.

- Extended beyond QA into hands-on delivery: using AI-assisted development to help build parts of a national SIM registry platform's own tooling and interfaces, alongside owning its test strategy.
- Authenticated 67 analytics events across Mixpanel, Customer.io, Firebase, and Adjust using Postman and Selenium, confirming 100% accuracy of triggers, properties, and parameter mappings.
- Built 5-KPI executive dashboards in Jira covering defect density, escape rate, execution rate, cycle time, and release readiness, used weekly by leadership for go/no-go decisions.
- Achieved zero critical defect escapes across 3 consecutive sprint releases by implementing deep link and deferred deep link regression suites, eliminating navigation failures before production.

SQA Team Lead | WADIC

November 2023 - July 2024 | Lahore, Pakistan

- Directed QA for a construction estimating SaaS platform serving engineering firms across 3 regions, owning test strategy for web, mobile, and desktop surfaces throughout the engagement.
- Authored 200+ test cases across 6 major feature releases, covering functional, regression, integration, and load testing scenarios tracked and managed in Jira and TestLink.
- Uncovered and resolved 5 critical performance bottlenecks through JMeter-based load testing, improving platform response time by 20% under peak concurrent usage.
- Decreased average defect triage-to-resolution time by 25% and cut invalid defect reports by 30% through standardized Jira bug reporting workflows and severity classification rules.
- Lowered sprint requirement ambiguity by 35% by establishing quality benchmarks and testing milestones in close collaboration with product managers and development leads.

Principal SQA Engineer | Hexaa

May 2021 - October 2023 | Lahore, Pakistan

- Owned module-level QA across 4 concurrent product streams, sustaining full functional and regression coverage across 30+ sprint releases over a 2.5-year tenure.
- Restructured the Jira defect management workflow, decreasing duplicate defect reports by 40% and cutting average resolution time from 3 days to under 1 day.
- Compiled a library of 500+ reusable test cases in Confluence and TestLink, shortening QA onboarding time for new engineers by 2 weeks and ensuring cross-team test consistency.
- Sustained a release defect escape rate below 2% across all projects through disciplined regression, integration, and exploratory testing on web, mobile, and desktop surfaces.

SQA Engineer | Aramis Enterprise Solution

March 2019 - April 2021 | Lahore, Pakistan

- Tested enterprise HRMS covering employee management, payroll processing, and performance tracking for 1,000+ records across 8 configurable modules using Postman and Selenium.
- Confirmed CRM data integrity across 10+ workflow modules including lead management, sales pipeline tracking, and customer engagement automation for a mid-size enterprise client.
- Lowered the defect injection rate by 30% through proactive collaboration with developers and business analysts to resolve specification gaps before each development sprint began.
- Established structured sprint quality reports and test status dashboards adopted across a 3-member QA team, giving leadership consistent and accurate visibility into release quality.

KEY ACHIEVEMENTS

• 75% drop in production defect leakage — Hayo • Zero critical defect escapes, 3 straight sprint releases • 67 analytics events authenticated end to end • Recognised for process improvement and reporting at WADIC	• 100% test case coverage across all 4 product modules • 30% less test design effort through AI-powered generation • 500+ reusable test cases compiled at Hexaa
